Your professional beautician
knows the answer...

Can your hair be damaged from brushing, alone?

All hair becomes damaged from exposure to sun and natural wear and tear. Orange juice, for example, and many chemicals used in the processing, also take their toll, not to mention all the hair-dressing and other treatments that are applied to our hair. The result is a beautiful, healthy head of hair that has been subjected to a wide variety of treatments. The health of the hair is affected by brushing, as well as by the other treatments.

Your professional beautician knows how to treat that damaged hair and make it healthy again. She knows the right products to use and the right techniques to apply. She also knows the right way to brush your hair, which can help prevent further damage.

For more information, contact your local professional beautician. They will be happy to help you achieve the hair of your dreams.
