Maxwell House Announces
Maxim®
Freeze-Dried
Coffee

Now, an entirely new process called freeze-drying actually makes it possible for you to brew real percolated coffee...without a percolator!

Maxim is an entirely new form of coffee. Maxim is crystals of real percolated coffee. Concentrated
Maxim, in fact, crystallized crystals with the power to turn every cup in your house into a percolator!

Maxim is an amazing breakthrough in coffee making. It is entirely different from any soluble coffee. It is entirely different from any ground coffee. Maxim is, in fact, crystallized crystals of real percolated coffee.

Maxim’s secret—freeze-drying—is the result of years of coffee research at Maxwell House. A way has been discovered to transform actual percolated coffee into concentrated crystals. Here’s how it is done.

Freshly percolated coffee is vacuumed into freezing containers. Maxim begins with pure red pots of dark, smoky, percolated coffee. This freshly brewed coffee is poured into specialized freezing chambers. Herein is the flash-freeze at the peak of perfection. When coffee flavor and essence are at their breakfast-time best.

Vacuum chamber turns block of frozen coffee into crystals.

After the coffee has been frozen, the ice is drawn off—not by heat which destroys flavor—but by an amazing new vacuum process. It spirits the ice away without losing any of the honest flavor and body of freshly-percolated coffee.

Freeze-Dried crystals that need no refrigeration! This “iced coffee” never contains crystals of real percolated coffee. And that’s exactly what Maxim freeze-dried coffee is—froth-beetroots coffee without the water. These flavorful crystals are fresh until you’re ready to use them. They need absolutely no refrigeration and can be kept right in your kitchen cupboard.

Different from any other form of coffee. You can tell at once that Maxim is unlike any other coffee you have ever used. Take a spoonful, and you are golden brown crystals that actually sparkle. Small there, and you smell the rich, mellow aroma of freshly percolated coffee.

Discover Maxim—new from Maxwell House. Get Maxim soon. Try it and see if you can detect a difference between Maxim and the good coffee you’ve been brewing in your percolator! You’ll get the surprise of your coffee-loving life! Discover Maxim—the new Freeze-Dried coffee from Maxwell House.

Turn your cup into a percolator! The real miracle happens in your cup. The moment you add hot water, Maxim’s concentrated crystals explode into real percolated coffee. Maxim actually turns every cup in your house into a percolator! No Comet. No grounds. No instant taste.

Important—you need less per cup! Because Maxim’s crystals are concentrated, you use less per cup than you do with any other form of coffee. For each cup, just use a level teaspoon (more or less to taste). You’ll find it’s surprisingly thirsty to use Maxim.

Our 4-oz. jar of Maxim makes as many cups as one pound of ground coffee.

Goldberg Aids In Labor Trouble In New York Strike Threats

By WALTERS WENDTENBERG
