Many students of the local Memphis College of Education were attending the University of Chicago this spring. The students are participating in a unique program designed to help them prepare for careers in education and teaching. The program is a collaboration between the University of Chicago and the Memphis College of Education. The students spend part of their time at the University of Chicago, where they attend classes and work with faculty members, and part of their time at the Memphis College of Education, where they participate in practical teaching experiences. The program is expected to produce highly qualified educators who will be well-equipped to meet the needs of students in the local community.

Teething Pain?

If your baby is suffering from teething pain, there are several things you can do to help ease the discomfort. First, try placing a cold or damp cloth on the affected gums. This will help reduce inflammation and provide some relief.

You can also try giving your baby a teething ring or teether to chew on. These are available at most drugstores and can help distract your baby and soothe the pain.

Additional tips include:
- Applying a thin layer of petroleum jelly to the gums
- Offering your baby a cold or icy food
- Giving your baby a small amount of ibuprofen

Remember, it's important to consult with your pediatrician before administering any medication to your baby.

Your professional beautician knows the answer...

Is peroxide needed to color unwanted gray hair?

Hair care and beauty experts agree that simply applying peroxide to your hair will not turn gray hair into dark hair. This is because peroxide is not designed to change the color of hair. It is used for other purposes, such as bleaching and lightening.

If you want to change the color of your hair, you should consult with a professional beautician or hair stylist. They can recommend the best products and techniques to achieve the desired effect.

In addition, keep in mind that hair color can be affected by factors such as diet, stress, and certain medications. If your hair is turning gray, it may be a sign of underlying health issues.

Jobs And The Jobless:

You can open new opportunities.

Obsolescent welfare programs have undermined the dignity of millions of Americans and actually penalized some men for going to work. How do we break the vicious cycle of welfare dependency? Elect Richard Nixon President.

We believe we need fewer people on welfare rolls and more people on payrolls. "Jobs are the issue," says Mr. Nixon. "You don't have housing, you don't have food, and you don't have human dignity."

After this proposed tax increase, many millions of taxpayers will be required to provide jobs and funds for the unemployed, a national concern that must be matched with an intelligent and a mobilization of the enterprise to open up new opportunities for the unemployed."

BY SAM BROWN

The popularity of the recent sports events has been unprecedented. This is due to the fact that many people have discovered the joy of watching sports on television. As a result, attendance at games has increased dramatically. However, it is important to note that this popularity should not overshadow the inherent risks associated with sports participation.

Although it is not a mandatory requirement, it is strongly recommended that individuals participate in sports activities during a season. In addition, it is encouraged to participate in a variety of sports to ensure a well-rounded athletic experience.

Recently, several events have taken place in the local area. These include a football game between the local high school teams, a basketball tournament, and a track meet.
